

Innovation for Coating Technologies

PRODUCT LINE-UP

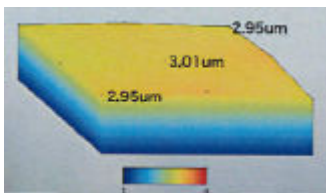

FLEXO PRINTING EQUIPMENT

Up to now, we have already sold more than 800 equipment all over the world for LCD PI film and touch panel overcoat formation process.

We meet various needs of the market from a small, manual printer for development and the research, to the latest G8.5 automatic printer for production use.

- Excellent film formation and quality
- Excellent stability for mass production
- Large selection of option

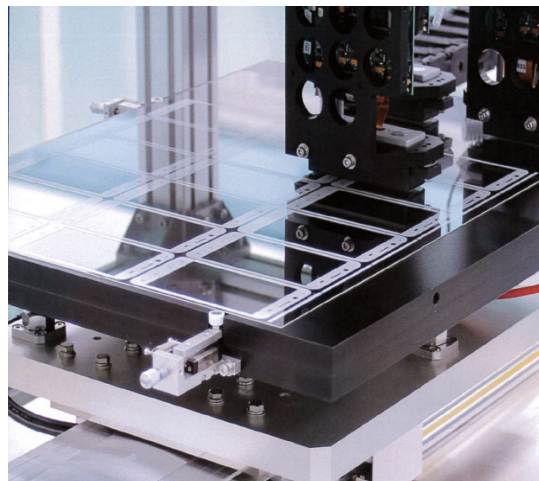

Uniformity of Overcoat printing

INK-JET COATING EQUIPMENT

This printer realizes high speed printing by super quality and high resolution pattern.

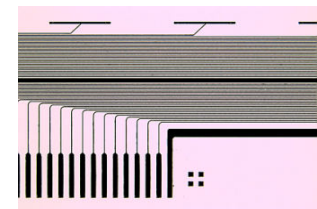

- Excellent film quality
- Excellent handling and maintenance property
- Capable of widespread application field

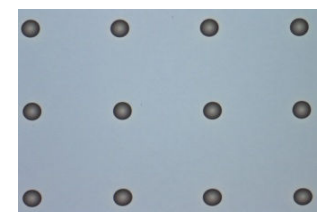

PRECISION OFFSET PRINTING EQUIPMENT

Achieved high precision printing by adoption of gravure method, and contributing to the next generation process development in the printed electronics field.

- Realization of process saving
- High precision printing
- High finely-resolved printing

Ag printing

Microscopic dot printing
